Open to everyone

Making sure your website is accessible means that everyone can find your products and services. The Web Content Accessibility Guidelines (WCAG) form the standard by which accessibility is measured.

For performance reasons, we can only check the homepage in this analysis. It is also limited to the WCAG accessibility guidelines that can be checked with automated testing. For a complete picture, a manual audit should be conducted.

CCPA

This business's website may have issues preventing this business from being CCPA compliant.

**Privacy policy found**

A privacy policy describes how you protect your customer's data when they visit your website. We discovered a privacy policy for this website.

**"Do Not Sell My Personal Information" link not found**

Under CCPA legislation, a business must provide a clear and conspicuous link on the website titled "Do Not Sell My Personal Information" that enables a customer to opt out of the sale of personal information.

**Method to request data not found**

It is required that a business make available to the customer a designated method of requesting the information that is stored about them. This was not found for this website.

**Forms discovered without given purpose**

Businesses which collect personal information about customers should disclose the purpose for collecting this information. There was at least one form missing this information found on this website.

Protect your customer data

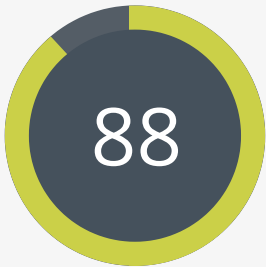

If you serve customers in California, it's your duty to comply with the California Consumer Privacy Act (CCPA).

We use a wide range of methods to determine the likely last-updated date of this website, including technical indicators and machine-readable dates within the text we have analyzed on the website. This gives us a best approximate for when a website was updated, but we cannot know for certain. Some websites cannot be dated at all.

Website speed

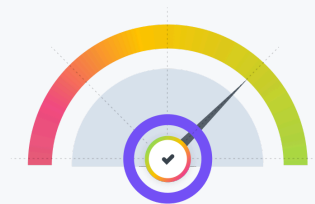

This business's website has a moderate load time which could be improved.

Don't keep them waiting

47% of consumers expect a web page to load in 2 seconds or less and 33% of people abandon a website that takes more than 4 seconds to load.

We measure website speed in a controlled environment - sometimes known as a "lab" test.

- We measured the speed of this business's website using Google Lighthouse, running in a controlled environment.
- We used the default Lighthouse settings for device and connection speed.
- If you have access to field data, this will be more representative of real-world user experience (e.g. from Google Analytics).

Source: Google Lighthouse

These figures were obtained using Google Lighthouse. As with any speed test, results may vary due to geographic location and network conditions at the time of test. Different measurement methods will produce different results.

Mobile

This website appears to be optimized for mobile phones.

Fits screen width

A mobile site should be free of horizontal scroll to avoid confusing users.

Has legible text

Text should be big enough to read on a mobile, without the need to zoom in.

Links are big enough to tap

Links on a website should be large enough to tap on a typical mobile screen.

Same content on mobile

Ideally websites should adapt to the screen size of the user's device, rather than loading separate HTML or redirecting to a separate mobile website.

Viewport is set

By setting the viewport, the website will load at a comfortable size.

We load the homepage for this website in a simulated smartphone, and then perform an analysis on the resulting code of the webpage. Some unusual websites can confuse this analysis. If in doubt, consult the screenshots above to determine if they look mobile-friendly.

Identify and fix page errors

Errors on your website can impact the user experience and may indicate that critical functionality is not working properly.

**Some pages of this website contain errors**

- JavaScript errors can break functionality, preventing features from working as intended.
- Errors can result in broken pages, missing content, or even security vulnerabilities.
- Errors create a poor user experience and may negatively affect SEO performance.

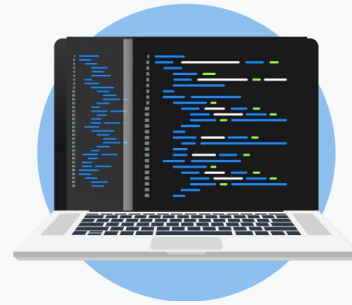

Code quality

This business's website is built using modern best practices.

Build it right

Websites are made of HTML code. Websites built to best practices are friendlier to search engines, more accessible and easier to maintain.

SSL

This business's website is using SSL to secure visitor data.

Encrypt everything

SSL ensures that information flowing to and from your website visitors is kept secure.

Server behavior

The configuration of this business's web server may impact its search engine ranking.

Optimize your web hosting

An optimized server configuration can boost your SEO, improve your website loading time and ensure your customer details are safe.

This business's website is duplicated on <http://www.promenadedds.com> and <http://promenadedds.com>.

- Although most people consider these the same, they are technically different websites.
- Search engines penalize content which appears on more than one website.

Structure your website content

Well defined headings help users and search engines understand and prioritise your website content.

Some of the headings on this business's website are not hierarchical

- Hierarchical headings make a page easier to read for both potential customers and search engines.
- The first heading on a page should be a top-level heading that describes content of that page.

Potential low quality backlinks

URL from	URL to	Backlink domain authority
https://www.uniteddentists.com/best-dentists/chandler/	Home page	18%

Many of this business's backlinks come from a small number of domains

- Search engines evaluate backlinks based on the quality of the website giving the links rather than the number of backlinks your website has.
- Having many backlinks from the same domain may harm your ranking in search engines as this may be an indication of a backlink farm..

This business's website may have low quality backlinks pointing to it.

- While good quality backlinks can boost your search ranking, low quality ones can harm it.
- Low quality backlinks may have been artificially created in an attempt to boost a website's ranking.
- Google views unnatural looking backlinks as an attempt to game their search algorithm.

 Stephanie Scott	Dr. Wei is hands down my favorite dentist, and I feel incredibly fortunate that I found him. From that very first visit, I knew I was in the right place. He is always on time, extremely thorough, and so gentle in his approach. He takes the time to explain everything clearly and makes sure you feel comfortable every step of the ...	
 Michael Politi	I highly recommend Dr. Wei at Promanade Dental. He is highly skilled and very professional as is his staff. They do not rush and explain procedures and why the procedures are necessary. They do not push additional services to increase services. The are friendly and caring.	
 Elizabeth Leung	My family and I have been at Promenade for over a decade, since I was a kid! Everyone is super friendly and extremely fast and professional, Each year I go I never have had a bad experience. Dr. Wei is very attentive and understanding about any problems you might have, he will go in-depth about any treatments if you are interest ...	
 Bryanne McCown	Dr. Wei and his staff are incredible. Not only are they thorough, but they are also friendly, excellent at communicating, and they have created a calm and relaxing office atmosphere. Dr. Wei went above and beyond for my family during two back to back dental emergencies and I couldn't be more grateful.	
 Shelly	My family and I have been getting our dental care and cleanings done at Promenade Dental for more years than I can remember! Dr. Wei is an excellent dentist and is incredibly kind and thorough. He is patient and takes the time needed to talk through any dental plan or procedure. We absolutely love Jolyn, our dental hygienist, ...
